

The most versatile range of service lifts, always with structure supporting frame.

Applications

Microlift is the ideal solution for private, industrial and commercial applications

The **Microlift** range includes models from 24 to 300 kg offering a wide choice of car sizes "of the shelf". Other non-standard sizes are also available.

All the models operate inside a rapidly erected structure supported frame which is galvanised for longer life. "Rise and fall" shutters or single hinged manual landing doors are finished in grey baked enamel RAL 7038 (standard), Daldoss RAL colours range or made in stainless steel AISI

304. The landing push button station is fitted with "lift arrival", "lift occupied" and "lift position" indicators.

Microlift features up to a maximum of 30 mt. structure height and up to three entrances can be fitted on each floor. Thanks to the reliable electronic control, efficient motor with high quality reduction gearbox and electromagnetic disk brake, the operation is extremely quiet and safe in any type of installation.

Microlift is the world largest selling range of service lifts with over 100,000 installations worldwide. The experience and know-how acquired from over 60 years in the lift industry operating in the most important market worldwide, has led to Daldoss developing a highly modern range of elevators which features cutting edge space-saving technology with a pleasing aesthetical design.

Microlift is the ideal solution in restaurants, hotels, chemist's, hospitals, offices, shops and multi level houses for the easy and uncomplicated moving of packages, letters, medicines, crockery and cutlery.

PHARMACIES

The 24 kg range is the ideal solution for transporting small items with maximum comfort and silence.

HOSPITALS

For moving any materials, even the most delicate, with maximum safety.

WAREHOUSES

With the 200-300 kg range is possible to move bulky materials between floors, also with trolleys.

HOTELS

The essential tool for easier cleaning, also with the double decker model for the double load of goods.

OFFICES

The mail and storage operations have a great ally in the range 24-50 kg.

RESTAURANTS

Microlift is THE service lift, also thanks to the heating system of the car for the transport of food and the double decker model, fully respecting the sanitary and hygienic regulations.

Typical applications

Table type models

All **Microlift** models operate inside a rapidly erected structure supported frame, which makes installation simple with minimal builder's work. **Microlift** are usually available with short lead time and, subject to builder's work, can be installed and working within a few days.

Installation in a restaurant-bar (Italy), model 50 kg with wood cladding. It perfectly fits the environment.

Installation in a clothing shop (Italy), model 50 kg, glass cladding and standard car in RAL 7038

Installation in a private house (Italy), model 24 kg with stainless steel finishes. Thanks to **Microlift** the transport of goods from the garage to the kitchen is not a problem.

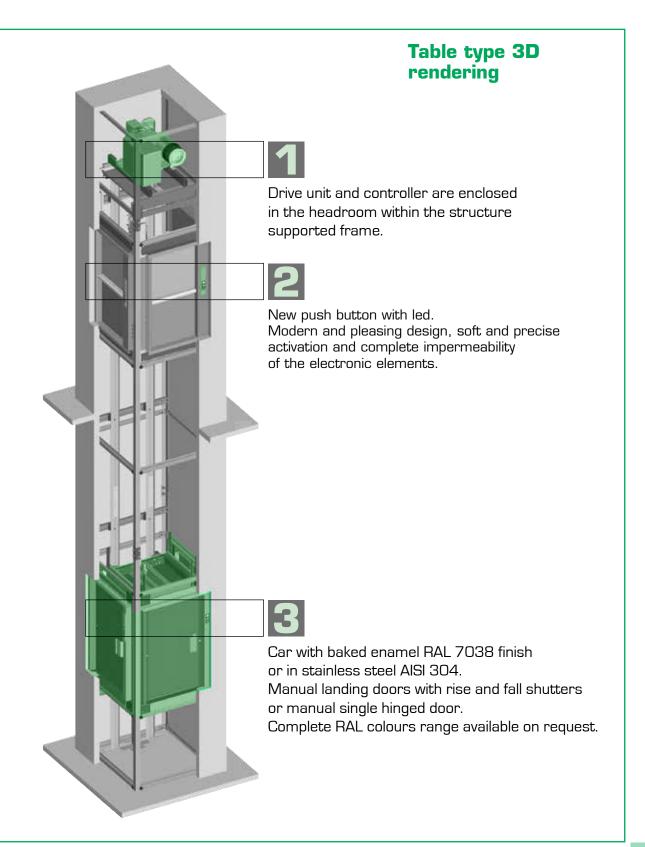

Installation in a copy centre (UK), model 100 kg, car and doors in stainless steel AISI 304.

Norms and regulations

- Machinery Directive 2006/42/CE
- Electromagnetic Compatibility 2014/30/EU
- Directive EN 81.3:2000 (accessible and not accessible shaft)

INSTALLATION

Typical applications

Floor type models

The modularity of components parts facilitates the installations of **Microlift** in any type of building. An opening through each floor, an electrical power supply and shaft enclosure in harmony with the interior design is all that is required to have **Microlift** quickly installed both in existing and new buildings.

Installation in a bar (Italy), model 100 kg, stainless steel finishes, specific for the food sector.

Installation in a warehouse (UK), model 200 kg. Also the biggest equipments can be moved without problem.

Installation in a commercial airport (UK), model 300 kg.

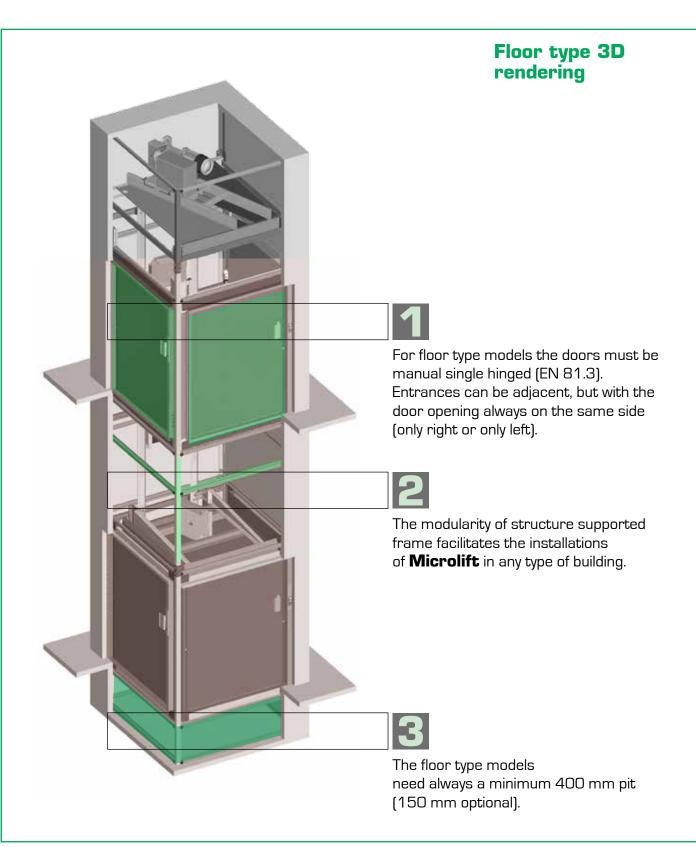

Installation in a warehouse (Australia), model 300 kg, standard finishes.

Spaces and costs saving

Microlift has been designed to reduced to the minimum the space occupied by the shaft, saving valuable floor space in the building. No separate motor room or load-bearing lift shaft is required. The low motor power of **Microlift** allows reduced energy consumption and the strength of components guarantee a safer, reliable and solid product. Thanks to the quality of the products, due to first class materials, brake downs are reduced to the minimum.

INSTALLATION

Finishes in details

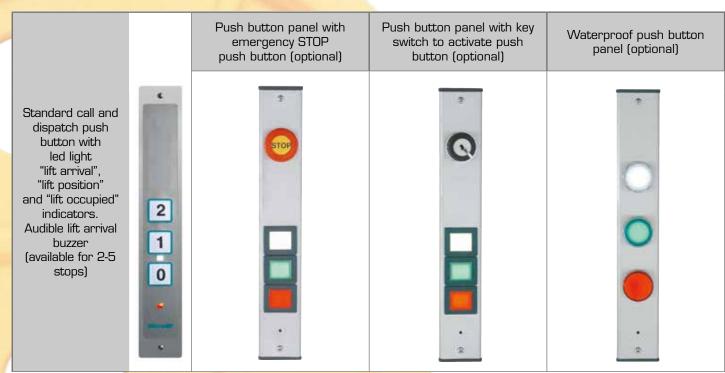

Standard and optional components

Microlift has been designed and built with extreme attention to quality and strength of materials, for ensuring maximum durability and minimizing maintenance and running costs.

Standard finishes

Landing indicators in satin stainless steel

Customized features

Microlift range has a wide range of finishes and optional and can be customized by installing accessories to further increase safety and functioning of the lift, e.g. over flight timer, over load device, retiring cam for landing door locking actuation, car and counterweight safety gear, etc.

Optional finishes

Car lighting	Car heating system with thermostat	Intercom system for voice communication between floors	Power supply cabinet and machine room lighting		

Customization of the service lift

Special version, materials and colours

Low headroom

Drive unit integrated in the headroom side wall. Headroom dimensions:

with rise and fall shutters 1400 mm, hinged doors 1100 mm.

Available only for 24-50 kg versions.

Double decker

Double car to transport food, medicines, clean/ dirty load, especially suitable for canteens, hospitals, restaurants, etc.

Combined landing doors: rise and fall shutters to access the upper car, hinged door for the lower car.

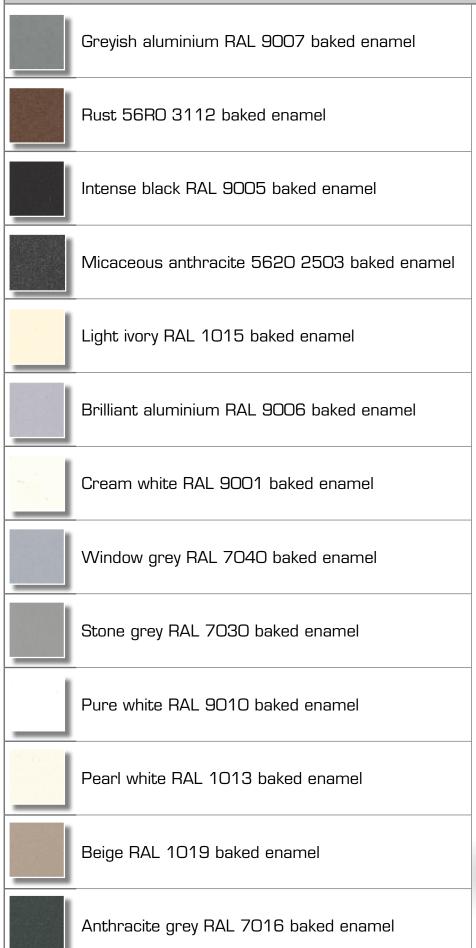

Standard colours and materials

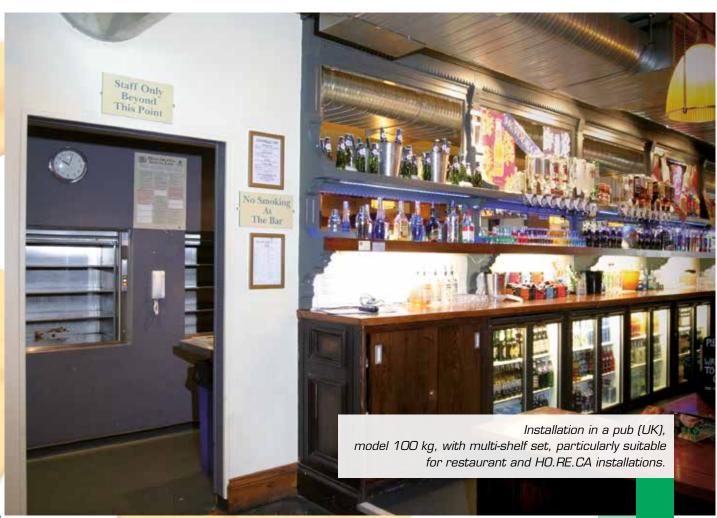

Daldoss RAL colours range (Complete RAL colours range available on request, as optional)

Installation in a bar (Spain), model 50 kg with stainless steel cladding.

Installation in a restaurant (UK), model 50 kg, with glass cladding.

Installation in a clothing shop (Italy), model 50 kg, glass cladding and standard car in RAL 7038.

Technical characteristics

Always equipped with structure supported frame for indoor installations

Microlift is always equipped with structure supported frame, fully automatic operation and lift positions indicators on each floor. For the installation, only an opening through each floor is required. Installation times for 2 stops standard models can be only 8 hours, depending on model and site conditions.

Standard	
Drive unit	1-phase ore 3-phase electrical motor equipped with electromagnetic disk brake and reduction worm gear box. Standard speed 0.35 m/s (24-50-100 kg) - 0.17 m/s (200-300 kg).
Operation	Fully automatic.
Rated load	From 24 to 300 kg.
Stops	From 2 to 12 in standard configurations.
Max structure height	Up to 30 meters.
Car	Constructed in mild steel, finished in gray baked enamel RAL 7038 (standard), with Daldoss RAL colours range or in stainless steel AISI 304 (optional). All versions have the base and a removable shelf in stainless steel AISI 304 (only for 24-50-100 kg).
Entrances	Up to 3 entrances can be fitted on each floor, in line, opposite or adjacent.
Landing doors	Rise and fall shutters or single manual hinged door. Baked enamel RAL 7038 finish (standard), or with Daldoss RAL colours range finish or in stainless steel AISI 304 (optional). Fitted with mechanical safety lock with electrical striker.
Landing push button station	Call and dispatch push button at each floor, "lift arrival", "lift position" and "lift occupied" indicators. Audible lift arrival buzzer.

Microlift is available with a wide range of finishes and technical options, with guarantee of excellent performances in any kind of installations.

Special lifts with customized dimensions available on request.

Optional	
Drive unit	Speed 0.6 m/s (24-50-100 kg), 0.35 m/s (200-300 kg). VVF speed controller. Over flight timer. Timer to return lift to the main floor.
Car	Ceiling lighting fixture. Heating device and thermostat. Rise and fall car shutters in stainless steel AISI 304. Collapsible car gate for MDL models. Additional shelves, multi-shelf set. Over load device.
Landing doors	Fire rated El 60 - El 120 (only hinged doors). Rise and fall shutters with motorized opening.
Landing push button station	Key switch push button activation. Intercom. Waterproof station.
Various	Machine room door with baked enamel RAL 7038 finish (standard), with Daldoss RAL colours range or in stainless steel AlSI 304 (optional). Fire rated El 60 - El 120 also available.

Safety features

Microlift fully complies to the Machinery Directive 2006/42/EC. Daldoss is able to supply various safety equipment to comply with different national and international standards and regulations.

Microlift®

Technical data				
Drive system	Traction type.			
Rated load	24-50-100-200-300 kg.			
Car speed	0.35 m/s (24-50-100 kg). 0.17 m/s (200-300 kg).			
Power supply	All principal forms, both 1 and 3 phase.			
Motor power From 0.33 kW to 1.1 kW according to model, s and power supply.				

Operation

The microprocessor controlled operation guarantees optimum performances and extremely low noise production.

Quality

Intelligent and modern management, maximum product standardization, highly automated production and the adoption of avant-garde technology enable Daldoss to guarantee constant compliance to the standards provided for by UNI EN ISO 9001:2008 Company Certification.

Standard EN 81.3 (safety rules for the construction and installation of lifts and service lifts, models from 50 to 300 kg)

The standard is applied in all UE-CEE Countries and all **Microlift** installations inside UE will be supplied according to this standard. The lift will be integrated with further components in order to guarantee the safety requirements given by the standard, both

made inside or outside the shaft.

for the use of the product and the maintenance operations

Spare parts and maintenance

Daldoss and its partners can provide a maintenance service covering the whole operational life of each lift.

One of the principal objective of a customer focused company is the establishing of a lasting business relationships with its Customers, based on mutual trust and satisfaction. For this reason, Daldoss can provide the original spare parts for all **Microlift** models. Moreover, all the **Microlift** lifts are supplied with 12 or 24 months guarantee valid from the date of the delivery of the equipment.

Certificates

The Daldoss service lift is designed and manufactured in accordance to the Machine Directive 2006/42/CE and in conformity to international standards (for example, Electromagnetic Compatibility 2014/30/UE). Daldoss is a certified company according to the ISO norms 9001:2008 and EN 1090-1+A1:2011

Test Certificate Electromagnetic Compatibility (EMC)

Company Certificate on Quality System ISO 9001:2008
